

OT Medicare Part B Evaluation Checklist & Quality Measures

Use the checklist below during outpatient, Medicare Part B occupational therapy evaluations as a reminder of areas to address. The American Occupational Therapy Association (AOTA) encourages practitioners to print the checklist and bring it with you to help guide client evaluations, as well as to educate and train your colleagues regarding the occupational therapy evaluative process. This document does not replace the clinical judgement of an occupational therapist. The checklist supports high quality occupational therapy evaluations that lead to occupation-based, client-centered interventions and quality performance measures.

A comprehensive occupational therapy evaluation is based on a theoretical model and follows the *Occupational Therapy Practice Framework* (AJOT, 2020). A top-down approach identifies occupations that are challenging and important to the client and then assesses related performance skills, client factors, environments and context, and performance patterns.

Occupational Profile

Each element of the occupational profile is considered from the client’s perspective. Take notes here or download the Occupational Profile at aota.org/profile to facilitate the interview and goal development.

- Client’s Concerns
- Successful Occupations
- Occupational History
- Interests & Values
- Contexts: Environment & Personal
- Performance Patterns
 - Habits Routines Roles Rituals
- Client Factors
 - Values/Beliefs Body Function Body Structure
- Client Goals/Priorities
